

LAM BAO TRAN – 陳寶林

Software Development · Computer Vision · Data-Driven Products

Email: lambaotran309@gmail.com | GitHub: github.com/Baaotraan0407 | Portfolio: Baaotraan0407.github.io

PROFILE

Recent Informatics graduate with hands-on experience building complete software projects, from real-time computer vision systems to data-driven product prototypes. Comfortable working across the full stack of a project: requirements, implementation, testing, and documentation. Uses AI tools to move faster while still verifying every result through testing and code review.

SKILLS

- **Languages:** Python, C++, HTML/CSS, JavaScript
- **AI / Computer Vision:** TensorFlow / Keras, YOLOv8, OpenCV, scikit-learn
- **Tools & Workflow:** Git / GitHub, GitHub Actions, VS Code, Jira, Streamlit
- **Practices:** SDD, BDD, TDD, AI-assisted development
- **Languages (spoken):** Vietnamese (Native), IELTS 6.0 (Expired by IDP), TOCFL A2 (Chinese)

PROJECTS

Real-Time Driver Drowsiness Detection — *Computer Vision / AI*

- Built a real-time system combining YOLOv8 face detection, Haar Cascades, and lightweight CNNs to classify eye-state and yawn from webcam video.
- Fused temporal features (MAR, PERCLOS) and a gaze-down guard to produce a stable drowsiness score, achieving 86% eye-state and 95% yawn validation accuracy.
- Achieved real-time performance at an average of 15.7 FPS on CPU-only hardware.

TrueCareer — Career Guidance System — *Data Science / Product*

- Designed an assessment-driven career guidance and course recommendation prototype for Vietnamese high school students.
- Applied K-Means clustering on 800 synthetic student profiles across 22 assessment features to group students into orientation clusters.
- Built a rule-based recommendation layer for majors, courses, mentor types, and career paths, plus a live Streamlit dashboard and an Axure UI prototype.

github.com/Baaotraan0407/truecareer-career-guidance-system

Studio Ghibli-Themed Productivity Website — *Front-End / Web*

- Built a to-do list and countdown timer web app with custom animated backgrounds and interactive UI, using HTML, CSS, and JavaScript.

EDUCATION

Yuan Ze University

Bachelor of Science in Informatics

International Bachelor Program in Informatics (IBPI)

2022–2026

GPA: 3.81 / 4.0
